

**Fork: RockShox Yari RC 170mm**

Follow RockShox Yari recommended settings on the left back side of the casting.

Mondraker recommended RockShox Yari fork settings based on Rider weight & Enduro application:

| SAG          |              | RECOMMENDED SETTING*  |             |
|--------------|--------------|-----------------------|-------------|
| rider weight | air pressure | clicks from full open |             |
| lbs / kg     | psi          | rebound               | compression |
| 120 / 54     | 55           | 4-5                   | open        |
| 140 / 64     | 60           | 5-6                   | open        |
| 160 / 73     | 65           | 6-7                   | open        |
| 180 / 82     | 70           | 7-8                   | open        |
| 200 / 91     | 75           | 8-9                   | open        |
| 220 / 100    | 80           | 9-10                  | open        |
| 240 / 109    | 85           | 10-11                 | open        |

Suggested fork sag 20%

**Rear shock: RockShox Monarch Plus R**

| SAG          |              | RECOMMENDED SETTING*  |  |
|--------------|--------------|-----------------------|--|
| rider weight | air pressure | clicks from full open |  |
| lbs / kg     | psi          | rebound               |  |
| 120 / 54     | 80           | 1                     |  |
| 140 / 64     | 100          | 1                     |  |
| 160 / 73     | 120          | 1                     |  |
| 180 / 82     | 130          | 2                     |  |
| 200 / 91     | 140          | 3                     |  |
| 220 / 100    | 150          | 4                     |  |
| 240 / 109    | 160          | 5                     |  |

Settings based on Enduro application & 30-35% recommended sag. Add 2-3 clicks each setting for a more controlled "XC-style" ride.

\* These values offer a general recommendation. Rebound and compression damping settings are a personal choice and should be fine-tuned depending on the riding style and terrain conditions.
